p/ Preliminary.

r/ Revised.

1/ Average wage/salary per job is calculated as total wage and salary disbursements divided by all full- and part-time wage

and salary workers. The data are by place of work rather than by place of residence.

- 2/ The data for New Mexico shown on county and metro area tables may differ from figures appearing in state tables seen elsewhere in this web site. The data in the state tables became available with the Dept. of Commerce "state releases". The New Mexico data in this table became available with the "county and metro area releases" and are consistent with county and metro area income. The state and county/metro area data follow different revision schedules and were released separately.

Source: U.S. Department of Commerce, Bureau of Economic Analysis.

Data released May 2004.

Table Prepared by: Bureau of Business and Economic Research,
University of New Mexico.
